where do i set the env variables required
Free 9 minutes ago
Searching for Replit variables
I'll check the project's required variable names and Replit's current instructions for adding secrets, so I can point you to the right place without asking you to share credentials here.
6 actions
In Replit, open Tools → Secrets (under Setup) and choose New Secret. Add each variable with its name and value there—don't paste credentials into chat or commit them to a .env file.
For Jobee:
Sign-in and saved profiles: SUPABASE_URL, SUPABASE_KEY, and SUPABASE_SERVICE_KEY
AI features: OPENROUTER_API_KEY
Add OPENJEV_URL and OPENJEV_TOKEN only if you're using the OpenJev resume service. For the published app, make sure the secrets are also available to the deployment in the Publishing settings.
